- The SAFESENSE+ project including objectives and expected results
- The SAFESENSE+ internal kick-off meeting of the consortium
- The initiation of SAFESENSE+ Project Result 1: “SAFESENSE+ Curriculum and Open Resource Toolbox”
- Next Transnational Partners’ Meeting

SAFESENSE+ is a 24-month Erasmus+ project (November 2021 – November 2023) with the main objective to create an impact within the field of OSH by providing sustainable educational material in an innovative way aiming the successful implementation of OSH measures in SMEs to prevent labor accidents and improve labor quality and production.

SAFESENSE+ will launch a curriculum and open resource toolbox, an interactive online learning environment including a mobile application and a training and a policy adaptation guide (Interactive eBook).

KICK-OFF MEETING

In early May, partners have met online for the purposes of the kick-off meeting where the consortium partners presented ideas and discussed further the expected project results, following the introductions of the partners. A great focus was given on Project Result 1, for which next steps and deadlines were defined. Managerial procedures, evaluation strategies, as well as dissemination and communication plans were agreed.

The work on the Project Result 1 has been divided into two phases: 1) the ‘theoretical’ framework and 2) the ‘competence’ framework. At this stage, each partner has prepared a national report regarding the NQF and ECVET levels, context (policies and issues), needs, skills, education and/or training programmes, and relevant OSH initiatives in each partner country. Based on the national reports, a list of Competences and Learning Modules to be included in the ‘SAFESENSE+ Curriculum and Open Resource Toolbox’ will be proposed and developed by early September 2022. The toolbox will follow the principles of adult learning, including: • Gamification • Usage of inquiry-based and problem-based learning approaches • Multiple learning styles • Contextualization learning • Provision of stories and case studies • Peer to Peer support and communication, and others.

The consortium partners are excited about the forthcoming next Transnational Meeting that will take place in Valladolid, Spain in October this year, where partners will be met face-to-face. The specific meeting is important to evaluate the first Project Result and define the next steps focusing on Project Result 2: Interactive Online Learning Environment and Mobile Application.
